

To whom it may concern;

29.03.2010

We have recently assigned Hungry Giant as our exclusive provider of waste collection and recycling services, and for the past 6 months we have yielded some fantastic results due to Hungry Giants 'different' way of doing things.

Before Hungry Giant, we were getting our bins at all 4 locations emptied almost daily. At the time we didn't realise that we were throwing recyclables into the bin, where it ended up in landfill. The Hungry Giant team educated us about what we can take out of the bin and recycle, and they went about providing us with a total solution. This has resulted in a 40% reduction in waste going to landfill, and has also reduced how much we spend on collections.

We were also able to stop dealing with multiple providers, and consolidate it all with one company. We now save time administratively because we don't have several invoices to pay at the end of the month.

The team at Hungry Giant are professional and customer focussed- a pleasure to deal with. We would not hesitate to recommend their services. They offered us a solution that no other waste provider ever offered, and now we are saving money and saving our carbon footprint.

Regards,
